Kevin Beach - Senior Front End Developer

EXPERIENCE:

Senior Front End Developer
R2integrated • November 2019 – Present

Front end lead on various projects. Leading the hiring/vetting process for new front end developers. Consistently bridging communication gaps with designers, back end developers and project managers. We use git for version control and specialize in 508/ADA compliance. Most recently, I have been building sites in Sitecore and AEM along with interactive wireframes using Jekyll and custom-built component libraries.

Front End Developer
R2integrated • May 2014 – November 2019

Work in an agile sprint environment using CSS3, HTML5, JavaScript/jQuery to develop designs into modern, best-practice websites across a wide variety of products/content management systems.

Junior Designer
Adventure Web Productions • September 2013 – May 2014

Design, develop, and update websites for clientele. Skills such as front-end development, direct client interaction, web design, working with content management systems and project management.

Web Design Assistant
Towson University • 2012 – 2013

Work with designers, editors, and content strategists to design, update, and develop various portions of Towson University's website. Skills such as troubleshooting code, optimization for the web, working in a group environment, and managing project workflow.

Web Design Assistant
Adventure Web Productions • 2012 – 2013

College internship that compelled me towards web design and development. Learned skills such as design for the web, web development, and project management.
